MESSAGE

Per our discussion on September 24, 2003, please find the attached replacement sheet (page 2) for the Supplemental Reissue Declaration filed on June 4, 2003 in the above-referenced patent application (correcting the patent number 5,600,445 to read 5,983,225 - typographical error).

***Please call me and let me know you have received this.

Thanks, Examiner Homere!

Cheryl Wagner

4. The entire title to said U.S. Letters Patent 5,983,225 is vested in TELENOR AS, Oslo, Norway.
5. I do not know and do not believe that my invention as disclosed and claimed in the present reissue application was ever known or ever used in the United States of America before the invention thereof by myself.
6. I acknowledge the duty to disclose to the United States Patent and Trademark Office all information known to us to be material to patentability as defined in 37 C.F.R. §1.56.
7. I believe that the original U.S. Letters Patent 5,983,225 to be wholly or partly inoperative or invalid, by reason of the patentee claiming more or less than he had a right to claim in the patent.
8. At least one error upon which reissue is based is an antecedent basis error in original claim 9. Original claim 9 claimed a "system" but depends from claim 8 which recites a "computer program product." That is "how" the at least one error renders the original patent wholly or partly inoperative or invalid.
9. All errors being corrected in the present reissue application arose without any deceptive intent on my part or on the part of the assignee.
10. I believe that all claims in this application find full support in the original specification.
11. I declare further that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of this application or any patent issuing thereon.
